EXPERIENCE

IoT Software Engineering Co-op **Rochester, NY**
KORE Wireless Inc. Jan. 2025 - May 2025

- Collaborated with engineers to develop and deploy production C#/.NET WPF features, including an XML configuration interface for Excel imports and a searchable parts-management UI, streamlining business workflows
- Automated customer-specific order fulfillment using C# and SQL Server, implementing business rules to update shipping methods, order statuses, and fulfillment comments while reducing manual processing
- Improved Boomi and NetSuite integration reliability through SQL-based error tracking, stored procedure-driven event updates, and manual error-resolution workflows that reduced the need for process reruns
- Developed reusable Boomi test harnesses for inventory transactions and SQL queries for error consolidation and deduplication, improving integration testing and troubleshooting

Self Determination Assistant **Rochester, NY**
People Inc. July 2024 - Apr. 2025

- Supported individuals with daily living, budgeting, transportation, and service-plan goals while maintaining accurate documentation and records

EDUCATION

Rochester Institute of Technology, Rochester, NY **Expected 2028**
BS/MS, Computer Science (Accelerated Program) GPA: 3.42/4.00

- **Honors**: Farash Foundation's First in Family Scholar (2023); Richard T. Cheng Endowed Scholarship (2024); Patrick P. Lee Scholarship (2025); Presidential Scholar; Dean's List (multiple terms)

PROJECTS

Flipper | Python, FastAPI, SQLite, SQLAlchemy, eBay APIs

- Built a full-stack resale management platform for product research, inventory tracking, sales reconciliation, and profitability analysis
- Integrated eBay APIs to retrieve marketplace comparables and completed-order data, supporting data-driven purchasing decisions
- Designed auditable financial workflows to track revenue, fees, shipping, taxes, and refunds while distinguishing estimated from confirmed values

Ordixa | Python, FastAPI, pandas, SQLite, SQLAlchemy, pytest

- Built a business data automation platform for importing, validating, and transforming Excel/CSV files through reusable processing workflows
- Engineered configurable data validation and transformation pipelines to identify missing values, detect duplicates, enforce column requirements, and generate structured outputs
- Developed automated validation and pilot-readiness checks with reproducible test fixtures to identify data quality issues and verify workflow reliability before execution

ScribeKit | Swift, SwiftUI, ScreenCaptureKit, Speech, macOS

- Built a native macOS meeting-transcription application that captures audio from user-selected applications and transcribes speech locally using Apple frameworks
- Designed explicit start, pause, resume, interruption, and stop workflows with incremental Markdown persistence, transcript history, and crash recovery
- Validated audio capture, transcription, and crash recovery through 923 automated tests, fault-injection scenarios, extended-duration testing, and accessibility checks

SKILLS

Languages: Python, C#, TypeScript, JavaScript, Swift, SQL, Java, C
Frameworks: .NET, WPF, React, FastAPI, SwiftUI, SQLAlchemy, Flask
Databases: PostgreSQL, SQL Server, SQLite
Technologies: Git, Docker, GitHub Actions, GitLab, Linux, REST APIs, Boomi
Practices: Automated Testing, CI/CD, MVVM, API Integration
